

You have never seen  
your energy consumption  
like this before!

MANAGE YOUR ENERGY

# Now you can see **WHERE, WHEN AND HOW** your energy is used!

## 1 MEASURE

Megacon build unique energy savings systems according to customer specific needs.

MC-Web can present the different measuring points in a logical tree structure and is easily accessible on the internet.

## 2 LOG

Consumption can be logged over a period of time allowing a clear picture of historical and current consumption.

You can choose your preferred option for presenting consumption profiles via the MC-Web portal.

Consumption profiles can be presented at intervals of:  
Minutely, 15 minutely, Half hourly, Hourly, Weekly, Monthly, Yearly.

The built in temperature function allows real time temperature sensing.

## 3 BILL

Allows access to detailed information for billing.

Energy data can be easily exported to other systems.

# You can make **GREAT SAVINGS** up to 40%

## 4 ANALYSE

Analysis of the graphical data allows comparison of all measured utilities over time.

Allows identification of baseline and erroneous consumption.

Megacon have the knowledge and experience to provide ideas on what actions can be taken.

## 5 ACT

Enables behavioural changes of the management and workforce to be implemented in order to negate unnecessary consumption.

Raises commercial questions such as:

Does the business have the most appropriate energy agreement with the existing energy provider?

Can industrial/commercial processes be better scheduled?

Is there any 'old' energy demanding equipment that may require replacement?

## 6 SAVE

Financial savings will be surprising.

Upto 40% savings can be achieved.

# Energy portal MC-WEB

MC-Web is a user friendly solution with the capability of collecting individual meter readings and energy data, which allows all energy consumed to be graphically profiled. Energy data collected can be imported/exported for billing purposes.

## Energy portal MC-Web offers:

- Graphic presentation of all meter values
- Easy comparison of meter profiles/objects
- Meter status and consumption
- Time stamped values from 1 minute
- Basis for billing
- Multiple user levels
- Unlimited number of users with log-in function
- Meters and object presented in tree-structure
- Virtual meter points
- Measure for your environmental system
- Customer fitted information portal

MultiLog G2

MultiLog G3T

MultiWeb G4T

With a growing demand for the reduction and optimization of energy consumption, Megacon products including MultiLog, MultiWeb and MC-Web provide important intuitive tools.

Showing energy consumption in a diagrammatic format gives great management opportunity in order to provide immediate attention to abnormal or erroneous energy consumption, resulting in instant energy savings.

The MC-Web portal gives a visual insight into the comparison of historic and current energy values showing evidential results of energy saving actions.

Investment in a Megacon meter reading system has a very short pay off time. For example; at the end of the first week, after installation, unnecessary energy consumption can be identified and eliminated, the results of the smallest actions can be seen the day after.
